Greenpeace USA California Wildfire & Crisis Emergency Response Guide 2021

Wildfire Preparedness

1. Track the fires:

 Check out SF Chronicle's Fire Map and Tracker or check out CAL FIRE for more details on active fires and containment efforts.

2. Sign up for updates:

 Sign up for CAL Fire Wildfire Alerts and California wireless emergency alerts or check out Nixle to subscribe to your local agency alerts.

3. Prepare your Emergency Supply Kit:

o Take a look at CAL FIRE's Emergency Supply Kit Checklist

4. Have a Wildfire Action Plan (and plan with the pandemic in mind):

CAL FIRE has a guide for creating your Wildfire Action Plan or check out SF
 Chronicle's Survival Guide for advice on how to survive any emergency.

5. Help Your Neighbors:

- In many cases, <u>donated clothes</u>, <u>supplies</u>, <u>and food ends up creating more work</u> for aid workers and local governments to sort through, and much of it ends up in the landfill. California wildfire victims don't need your old stuff. Cash is best. You can donate to local relief funds or funds geared toward impacted communities and areas:
 - Solano Disaster Relief Fund
 - Napa Valley Community Foundation
 - North Valley Community Foundation
 - Community Foundation Santa Cruz County Fire Response Fund
 - San Mateo and Santa Clara County Fire Relief
 - Monterey County Community Resilience Fund
 - Diocese of Sacramento Fire Assistance Fund
 - Latino Community Foundation NorCal Wildfire Relief Fund
 - Big Basin Redwoods Recovery Fund
 - Check out other wildfire funds here

6. Returning Home:

- Before returning home from a fire-impacted area, <u>check out this Returning Home</u>
 <u>Checklist from CAL FIRE</u>.
- You can see road closures and travel restrictions on this <u>CalTrans map</u>. Click on the "QuickMap Options" tab on the upper left, click on "Road Conditions" and select "full closures" or other conditions you would like to view.

7. Protecting Against Future Fires:

If you live in a wildfire-prone region, <u>check out these resources on</u>
 home-hardening and making your home more fire resistant or this guide on

 Preparing Your Home from University of California Cooperative Extension.

Smoke and Air Pollution

1. Understand your risk:

 Exposure to wildfire smoke and pollution may disproportionately impact children, pregnant women, older adults, outdoor workers, people with underlying respiratory or cardiovascular conditions; socioeconomically disadvantaged populations.

2. Check air pollution levels in your community:

- PurpleAir provides neighborhood-level air quality reporting
 - NOTE: Click on the "none" drop down menu in the map data layer and select "LRAPA" for a true reading. (This article has more info).
- AirNow also has an interactive map with Air Quality Index information.
- You can also sign up for Spare The Air air quality alerts in your community.

3. Stay inside.

- lif air quality is at an <u>unhealthy level (150 PM2.5 or higher)</u> or you smell smoke, stay indoors with windows and doors closed.
- Install a high-quality air filter in the HVAC system with a minimum efficiency reporting value (MERV) rating of 13 or higher
 - OR portable HEPA filter air purifier <u>certified by the California Air</u> <u>Resources Board</u>
 - OR make a DIY version with a box fan and air filter.

4. Wear a mask:

 N95 masks offer the most protection against wildfire smoke. KN95 masks also work well. Cloth masks are better than no mask, but aren't able to efficiently filter out tiny hazardous particles found in smoke. Read more about how your COVID masks can protect you from wildfire smoke

Power Blackouts

1. Sign up for alerts from your local utility company

- PG&E Alerts
- Southern California Edison Alerts
- San Diego Gas & Electric Alerts

2. Get a back-up charger for your devices

o This guide has top-rated USB power banks for phones and tablets

3. Prepare ahead of time!

- Check out these tips from NYT on how to prepare (ex. plan for medical needs, like medication that needs refrigeration) and things to do ahead of time (ex. Learn how to manually open your garage door, if you have one).
- Don't forget that emergency kit!

4. If you need rely on power for medical needs

- Talk to your doctor in advance about how to prepare with medications or mobility needs.
- o If possible, you may want to stay with a family member or friend who has power.
- You can register for <u>PG&E's medical baseline program</u>, if you have a
 life-assisting medical device, which will qualify you for lower rates and provide
 you with additional advance notification.

5. Help conserve power & stay cool

 Check out these tips from LA Times on conserving power and staying cool without upping your electricity bill during a heatwave

6. What to do during a shutoff

- Unplug or turn off any appliances to prevent damage from surges when the power is restored.
- o Keep the fridge and freezer closed as much as possible, or use coolers with ice
- Check in on neighbors, especially those who may need assistance
- This KQED guide has more tips for how to prepare and what to do during a power blackout

7. After the shutoffs

 If you experience a loss due to extended power outages — ex. food in your fridge going bad — you can file a claim with the utility.
